What Are Online Paid Surveys?

Online paid surveys are used for market research to gather data on consumer behavior. By participating in a survey you are giving companies your opinion on different products and services. Online surveys help companies determine what the consumer wants so they can fill their needs. By filling out an online survey you help the company to serve the needs of the consumer better.

It is worth it for the company to pay you to fill out a survey in order to determine whether a product or service is worth their time to develop. By asking hundreds or even thousands of people's opinion about what they want before a product is put on the market, it can save the company millions of dollars.

It is an economical way for companies to find out what the consumer wants. By giving small payments or incentive gifts for filling out an online survey, it is much more cost effective for the company than doing it through the mail or on the telephone.

The best online paid survey companies are the ones that pay you money for your time. These companies will not sell your information to telemarketers or fill your email with thousands of useless emails. The good companies will let you know right up front exactly how much they pay for each survey they ask you to fill out. You can usually tell a good online survey company by checking out their website and making sure it gives you all the information about the company and you're earning potentials.

By filling out surveys you offer a benefit to many companies by telling them your opinion about their products. Legitimate companies offer to pay people every day just to get their opinions. You can make a good extra income by filling out surveys online.

Surveys are necessary for helping companies determine what people like. If they can find out what will be the most popular and useful products for people, this will help them to increase their sales by offering the right products.

Companies have been using a research for many years as a way to find out what customers need. Paid online surveys have now made it easier for more companies to use surveys in order to find out what people want. Thanks to the Internet this opportunity is now open to almost everyone. Taking surveys online is a great way to make extra income and have fun while doing it.

If you are looking for a way to make some extra income, paid surveys can be a fun way. There are millions of companies that offer work-at-home online surveys. The legitimate companies pay their members for their opinions.

Can You Really Make Money With Paid Surveys?

Yes, you certainly can. There are many companies that will pay you cash to fill out their surveys. The trick is to find the right companies that offer the best payments and can be trusted to actually pay. Don't worry we will discuss them in this report.

It is definitely possible to earn a good monthly income by participating in online surveys. At first it will take a lot of time and effort to set everything up, however it is still very doable and there is a lot of money to be earned. Before signing up with any survey company, it is important to check them out. Be sure to follow the checklist below to give you the best chance possible for taking surveys to become a lucrative and enjoyable activity.

1. Before you sign up for paid survey sites, be sure to create a new email account that will only be used for your paid survey emails. By having a separate email it makes it easier to find any new invitations sent from the survey sites. This is also helpful as you can keep track of any of them that are sending just a bunch of junk mail so you know which accounts to close.

2. Read the privacy policy and terms of use to make sure you are not going to have your email sold to every company they can sell it to. A good reputable company will not sell your email or send you dozens of emails every week.

3. Read the frequently asked questions to be sure they offer what they claim.

4. Find out how they pay. Do they pay with prizes or cash? Do they have a minimum amount you must make before payment is sent? Check to be sure the minimum is not so high that your chance of being paid without filling out too many surveys is slim.

5. Check out their payment methods. Do they send you a check, pay with Pay Pal or another way. If they say they want to pay with a bank draft, you may want to hit the back browser fast and get out.

Earning an Income with Paid Surveys

6. Read the rules of the survey if offered before you start filling it out.
7. Be sure to see if participation is available in your country.
8. Check to make sure you are eligible. Some sites require that you be over 18 years of age. Some sites will only allow one member from each household to have an account. Just as long as you have checked out the entire site before signing up, you will be less likely to have any problems.
9. Ask friends or other people that are doing surveys for the best ones they have found. You will also want to ask them which ones to avoid.

By following this simple checklist, you will have the best chance for turning your online survey business into a great way to make extra income. With so many legitimate companies available online offering income for surveys, you should easily be able to make some extra cash.

Secrets to Success with Paid Surveys

Starting an online work from home business can be time consuming and difficult, especially if you don't have a lot of money to get your business off the ground. One of the easiest ways to get your business started with some capital is with paid surveys. Paid surveys are a terrific, no risk, low time commitment way to get some cash flow happening while you develop other home business opportunities.

The first question to ask is how much can you expect to earn completing online surveys? Well that depends but the survey sites know that your time is a valuable commodity and they are willing to pay handsomely for it! When you start you can expect to earn around \$15 to \$20 per hour of doing surveys. You can easily increase this rate as you become more skilled and valuable to the research companies. As they get to know you they will invite you to participate in focus groups which pay between \$50 and \$150 per hour for your attendance at these focus group sessions.

So what are the secrets in maximizing your income with paid surveys?

Secret #1. Sign up for as many market research companies as you can. Some companies only send out invitations on a monthly basis, or on a fortnightly basis. The more you sign up for the more invitations you'll receive. The best way to sign up is through a linking site. These sites have spent countless hours trawling the internet for the cream of the crop market research companies. They also provide great tips and handy time saving ideas so you can maximize your income.

Secret #2. Complete the 'Screener Surveys'. Often the market research companies ask you to complete some free surveys to get started. This helps them to learn about your interests and what surveys are right for you.

Secret #3. Tell the truth. Market research companies are interested in your honest opinions and are skilled at methods to spot liars and cheats. Once they catch you don't expect to get any more invitations to complete their surveys!

Secret #4. Complete the survey as soon as possible. Check your email daily and you won't miss any invitation because you were too late! Quite often the early responder gets the survey!

Secret #5. Have Fun! Being able to share your opinion about products and services is very rewarding. Often the surveys include video and sound and are great fun to complete! So let me encourage you to start earning some extra cash from home, by simply responding to surveys that arrive in your email inbox!

Why People Fail to Make Money With Paid Surveys

Paid online surveys offer a good opportunity to make money. Today we are going to discuss why some people fail to make money with paid online surveys. The actual work involved in doing the surveys is fairly fast and easy. Even though the surveys are easy, there are a lot of reasons that you can fail including not planning, organizing or setting up your survey business correctly.

Here are some of the main reasons that people fail to make money with paid online surveys:

1. In order to make a good income with online surveys you need to sign up for a large number of survey sites. The reason for this is most survey sites only offer you a couple of surveys per week or less. By signing up for as many survey sites as you can, you will have better chance to keep busy filling out surveys on a daily basis.
2. Another reason that could cause failure is not checking your survey email often enough. The survey companies will send you an email to offer you the chance to do a survey. If you do not get back to them quickly enough, they will offer it to somebody else and you will lose your chance.
3. Not reading the fine print on the survey websites. Each time you sign up for a survey website you need to read the entire site thoroughly. If you are not sure of their rules or requirements you may sign up for sites that are not honest and do not pay. Make sure that you read the privacy policy, terms of use, frequently asked questions, how it works, and any other information that is necessary to be sure they are a legitimate company.
4. Expecting too much. If you start off with your online survey business and expect to make hundreds of dollars the very first week, you may become frustrated and quit. You need to give the survey companies time to offer you surveys to fill out. With a little patience you will find you can make more income each week.
5. Turning down too many surveys. If you are constantly ignoring your emails or turning down offers to fill out surveys, the companies will stop offering them to you. You need to treat this as a business and whenever offers come in make sure that you are ready to take them up on them.
6. Signing up for unethical companies who promised you the world. If the company says you're going to make \$10,000 a month starting today, it's pretty good chance you're being scammed. A good rule of to follow is, if it looks to good to be true, it probably is.

Take a little time each day to sign up for more survey sites until you find yourself getting offers on a daily basis. It will take time to build your online survey business but once things get going you will see a steady flow of cash.

How To Earn \$2000/month With Paid Surveys

The big key to success with Paid Surveys is Focus Groups.

You should become a member of one of the services listed on my site just for the single benefit of being able to join a focus group – they are that lucrative!.

What is a Focus Group?

Very simply, it is a group of people who are brought together to discuss a particular item or topic for an hour or so. The item could be a TV show, a new kind of potato chip, an electric toothbrush, GM trucks, a new refrigerator, you name it.

My wife gets invited to focus groups ALL the time. They usually last about an hour and the LEAST amount of money that has ever been offered her is \$75. They usually pay \$100 or more. You come together and talk about your experiences with the product, possible ideas about how to improve it, and then *as you walk out, they hand you a nice \$100 check!* I'm serious. It's that easy. The great part about it is that it's fun too!

Sometimes it's just a phone interview and they will still pay you \$75-\$100 for your time answering questions on the phone!

Focus Groups is the beautiful little secret about signing up for paid surveys. Here's how to do it. On any of the survey services listed on my site, sign up for the companies that do Focus Groups. There are Focus Groups happening all over the world. Even in the smaller communities. Once you start getting emails for Focus Groups, show up on time and be helpful with your evaluations. You will soon find that you are very much in demand by the Focus Group companies and your email will fill up with high paying Focus Group opportunities. Also, the more you do these, the more value YOU have as an evaluator. Eventually you get invited to "elite" groups where you will get paid even more--AND you get a LOT more invitations!

How does an extra \$2,000 per month sound?

Honestly, and extra \$2,000 a month is not difficult. Here is how you do it: Take three \$10 surveys a day (about a 30 minute investment), then do 3 focus groups or phone interviews a week (a lot of these are done on Saturdays or in the evenings). The surveys would pull in \$900 a month and the Focus Groups would pull in \$1200 a month. That's \$2100 per month in your spare time.

There is no end to the surveys that can be taken, so if you want to do more than 3 a day, go for it!

How To Get Started With Paid Surveys Immediately

It is easy to get started. Once you have set up a separate email just for your survey business, simply join a survey site that will provide you with a list of high quality high paying surveys. Sign up for all of legitimate companies listed in the membership area of your chosen survey site. Be sure to keep an eye on your email for offers to take surveys. Be sure to take as many surveys as you possibly can so that the offers will keep coming in. Before you know it will start seeing those pay a checks come in the mail.

Note: Make sure to fill out the surveys accurately so the surveyors start to see you as a valuable survey taker. This will get you more lucrative surveys. Also make sure to check your email everyday and fill out as many surveys that are offered to you as possible. If you stop filling out surveys your account will be marked as inactive and your opportunities for joining focus groups and filling out higher paying surveys will disappear.
